3. Overview

3.1 General Information

The AM62xx is an extension of the Sitara™ Industrial/Auto-grade family of heterogeneous Arm® processors with embedded 3D graphics acceleration, dual display interfaces and extensive peripheral and networking options. AM62xx is built for a broad set of Industrial and Automotive applications.

AM62xx contains up to four Arm® Cortex®-A53 cores with 64-bit, Single-core Arm® Cortex®-R5F Device Manager subsystem, IMG AXE1-16 3D graphics module, dual-core PRU module and a Cortex®-M4F MCU module.

The Cortex-A53 provides powerful computing elements for Linux applications. Linux and Real-time (RT) Linux, which stays updated to the latest Long Term Support (LTS) Linux kernel, bootloader and Yocto file system.

AM62xx has a powerful IMG AXE1-16 3D Graphics core for HMI applications and QT acceleration with dual display output options at resolutions up to 2K @ 60 fps.

The 2-port Gigabit Ethernet switch has one internal port and two external ports

with TSN support. An additional PRU module enables real-time I/O capability. In addition, an extensive peripherals set is included in AM62xx to enable system level connectivity such as USB, MMC/SD, Camera interface, OSPI, CAN-FD and GPMC for parallel host interface to an external ASIC/FPGA.

AM62xx also supports secure boot for IP protection with the built-in HSM (Hardware Security Module) and also employs advanced power management support for portable and power-sensitive applications.

3.2 Technical Data

Feature		Details
CPU	Architecture	Up to Quad core 64-bit Arm® Cortex®-A53 processors
	CPU	AM62xx See LINK for further information: „3.4 Additional information“ See TI Homepage for further information: https://www.ti.com/product/AM625
	Cache	<ul style="list-style-type: none"> • 32 KB L1 Instruction Cache for each Core • 32 KB L1 Data Cache for each Core • 512 kB shared L2 Cache
	Frequency (max)	up to 1.4 GHz
	Co Processors	1x Cortex®-M4F MCU 400 MHz single core processor 1x Dual-Core programmable RTU with up to 333 MHz
	Security	Hardware security module: <ul style="list-style-type: none"> • Secure boot supported • Cryptographic acceleration supported • Trusted Execution Environment (TEE) supported • Secure storage support
GPU		IMG AXE1-16
Memory on Chip	RAM	up to 816 KB OCSRAM
Memory External	DRAM	up to 2 GB LPDDR4
	FLASH	up to 32 GB eMMC 8 MB QSPI NOR
	EEPROM	32 kB EEPROM
	GPMC	8 to 16 bit and up to 133 MHz
Ethernet	Speed	2 x 1000 Mbps and 10/100/1000 Mbps IEEE 1588
Multimedia	Display Subsystem	<ul style="list-style-type: none"> • Dual display support • 1920x1080 @ 60fps for each display • OLDI/LVDS (4 lanes - 2x) • 24-bit RGB parallel interface
	2D/3D Graphic Processing Unit	<ul style="list-style-type: none"> • Fillrate greater than 500 Mpixels/sec • 500 MTexels/s, >8 GFLOPs • Supports at least 2 composition layers • Supports up to 2048x1080 @60fps • Supports ARGB32, RGB565 and YUV formats • 2D graphics capable • OpenGL 3.x/2.0/1.1 + Extensions, Vulkan 1.2
	One Camera Serial interface (CSI-Rx) - 4 Lane with DPHY	<ul style="list-style-type: none"> • MIPI CSI 1.3 Compliant + MIPI-DPHY 1.2 • Support for 1,2,3 or 4 data lane mode up to 2.5Gbps • ECC verification/correction with CRC check + ECC on RAM • Virtual Channel support (up to 16) • Ability to write stream data directly to DDR via DMA
	Audio	<ul style="list-style-type: none"> • Transmit and Receive Clocks up to 50 MHz • Up to 16/10/6 Serial Data Pins across 3x • McASP with Independent TX and RX Clocks • Supports Time Division Multiplexing (TDM), Inter-IC Sound (I2S), and Similar Formats • Supports Digital Audio Interface Transmission (SPDIF, IEC60958-1, and AES-3 Formats) • FIFO Buffers for Transmit and Receive (256 Bytes) • Support for audio reference output clock
Expansion	SD/SDIO, MMC, SDXC	2 x SD/SDIO (4-bits)
Functional safety		<ul style="list-style-type: none"> • Developed for functional safety applications • Documentation will be available to aid IEC • 61508 functional safety system design • Systematic capability up to SIL 3 • Hardware Integrity up to SIL 2 • Safety-related certification • IEC 61508 certification by TUV SÜD planned
USB		2 x USB 2.0

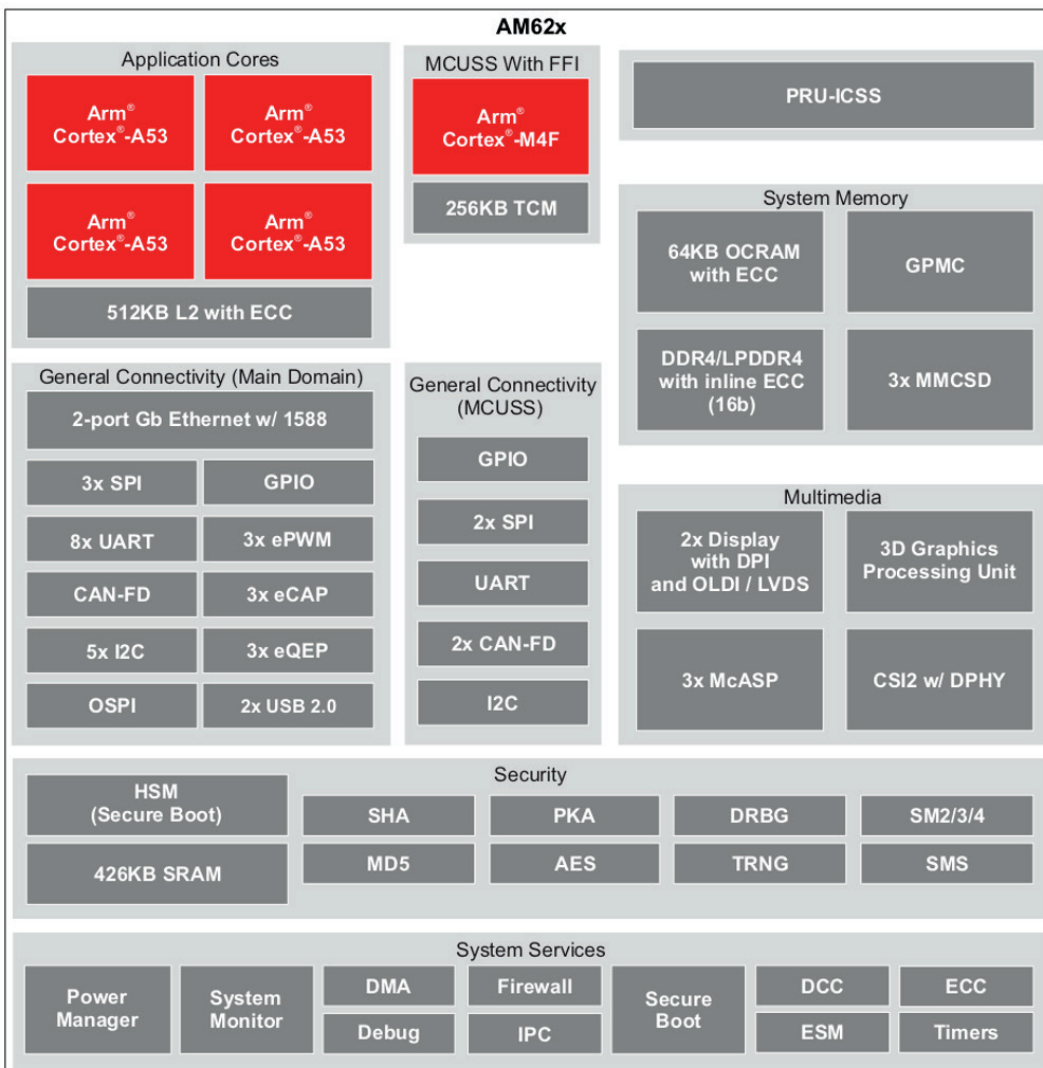

Feature		Details
Serial	SPI	5
	I2C	6
	UART	9
	QSPI	1 (2 x CS)
	QEP	3
	CAN-FD	3
Miscellaneous	Watchdog	Yes
	JTAG	Yes
	GPIO	up to 198
	PWM	3
	Timer	12
	Boot Mode	Secure boot supported
Mechanical Information	Input Voltage	5.0 V
	Power Consumption	4 W
	Dimensions	30 x 40 x 4 mm
	Operating Temperature	<ul style="list-style-type: none">• Industrial temperature range: -40 to +85° C• Consumer temperature range: 0 to +95° C
	Connector	2x 60 pin and 2x 80 pin
Operating System	Linux	meta-bytesatwork available on github

3.3 Block diagram of AM62xx

The AM62xx from Texas Instruments is the industry's first multiprotocol gigabit (Gb) time-sensitive networking (TSN)-enabled processor family. The new, highly integrated Sitara AM62xx processor provides industrial-grade reliability, with dual and quad Arm Cortex-A53 core variants built to meet the rapidly evolving needs of Industry 4.0 in factory automation, motor drives and grid infrastructure. The inclusion of an on-chip isolated dual-core microcontroller (MCU) subsystem enables designers to use the AM62xx to create more dependable and functional safety-certifiable products while reducing overall system-level complexity.

Key Features of AM62xx

- > Quad Arm® Cortex®-A53 core, up to 1.4 GHz.
- > Cortex®-M4 400 MHz processor
- > Imagination Technology IMG AXE1-16
- > Dual Display supported
- > Secure boot supported
- > Prepared for functional safety application

3.4 Additional information

For further information regarding the AM62xx CPU, please visit the homepage of Texas Instruments:

3.5 Decision guidance byteENGINE AM62xx

The following four steps help you identify the suitable processor for the specific customer application.

- > **Step 1:** Select the needed CPU.
For details see „[3.2 Technical Data](#)“
 - > **Choose with 3D-Graphics Engine:**
 - Quad Core: AM6254
 - Dual Core: AM6252
 - Single Core: AM6251
 - > **Choose without 3D-Graphics Engine:**
 - Quad Core: AM6234
 - Dual Core: AM6232
 - Single Core: AM6231

- > **Step 2:** Select the needed CPU speed.
 - > **Choose 1.0 GHz / 1.4 GHz**

- > **Step 3:** Select the needed flash memory type and capacity.
 - > **Choose eMMC 8 / 16 / 32 / 64 GB**

- > **Step 4:** Select the needed RAM capacity.
 - > **Choose 512 / 1024 / 1536 / 2048 MB**

- > **Step 5:** Select the the needed temperature range.
 - > **Choose consumer or industrial**

3.6 Dimensions of byteENGINE AM62xx

The following illustration shows all important dimensions for mounting and installation of the industrial computing module byteENGINE Am62xx.

- > All dimensions are indicated in millimetres (mm).

> Module design in scale 1:1:

3.7 AM62xx connectors layout

The AM62xx is connected to the carrier board with 2x 80 and 2x60 pins on four module connectors. The following picture shows the location of the connectors on the bottom side.

CONNECTORS

- X1** Power, LVDS1, LVDS0, OSPI, CS1, RGMII2
- X2** UART0, USB1, MCU_MCAN0, MCU_MCAN1, MCANO, JTAG, USB0, WKUP
- X3** MMC1, MCU_UART0, MMC2, MDIO, RGMII1, SPI0, MCASPO
- X4** LCD, GPMC, I2C1, MCU_I2C0

LINK:
[Schematic of the connectors X1, X2, X3 and X4](#)

NOTICE
 The module is held in the connectors with a considerable retention force. To avoid damaging the modules' connectors as well as the carrier board connectors while removing the module the use of an extraction tool is strongly recommended.

3.8 Connectors - DF40C-80DP and DF40C-60DP

The **byteENGINE** uses four Hirose 0,4 mm Board to Board Plug connectors. For more specific information about the connectors used, please visit:

CONNECTORS

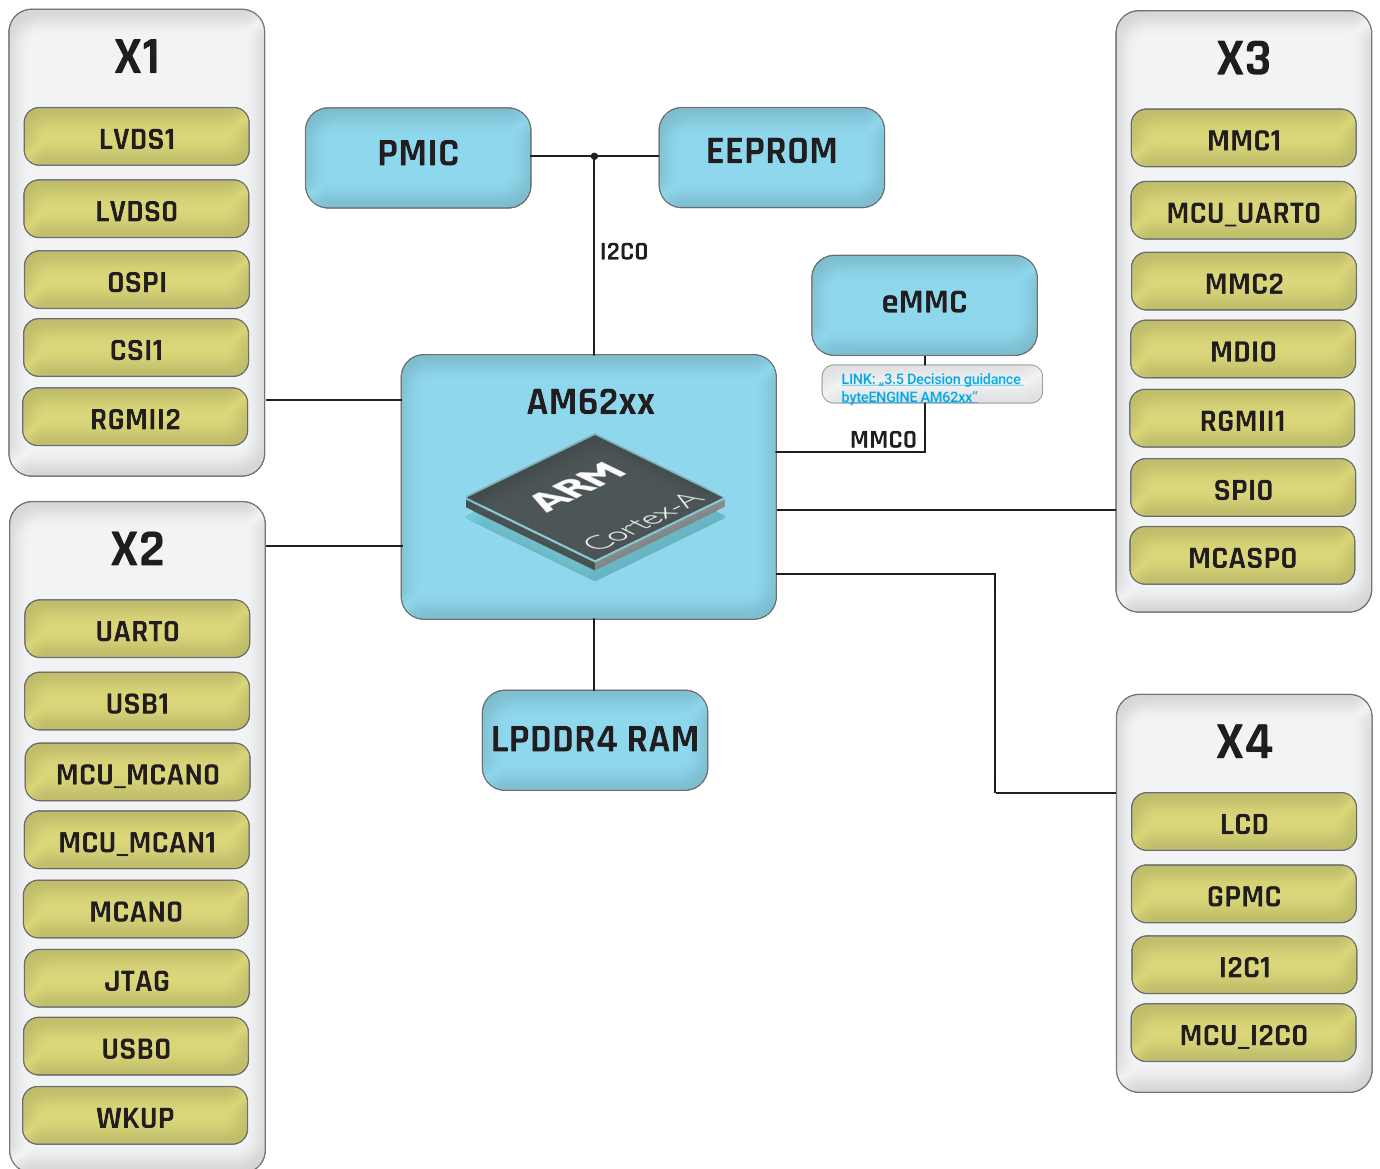

- X1, X3** DF40HC(3.0)-80DS-0.4V(51)
- X2, X4** DF40HC(3.0)-60DS-0.4V(51)

LINK:
[Datasheet of Hirose DF40-Series connectors](#)

3.9 byteENGINE AM62xx Connectors Overview

The following illustration shows the „default configuration“ of the byteENGINE AM62xx. The function of the components shown in blue squares cannot be changed. The yellow squares show the module connectors X1, X2, X3 and X4. The functions of X1, X2, X3 and X4 can be adapted and each connector module serves multiple functions. The detailed pinout functions are shown in chapter „4. Pinouts“.

4. Pinouts

4.1 Restrictions

These peripherals are internally connected and should not be utilized in the customer design if the components are populated and in use.

Warning:

EEPROM: Production data storage, do not use for application, readonly usage.

Restricted peripherals

I2C0 PMIC and EEPROM

MMC0 eMMC

Ball	Pin Name	Used for
I2C0_SCL	B16	PMIC/EEPROM
I2C0_SDA	A16	PMIC/EEPROM
MMC0_CLK	AB1	EMMC
MMC0_CMD	Y3	EMMC
MMC0_DAT0	AA2	EMMC
MMC0_DAT1	AA1	EMMC
MMC0_DAT2	AA3	EMMC
MMC0_DAT3	Y4	EMMC
MMC0_DAT4	AB2	EMMC
MMC0_DAT5	AC1	EMMC
MMC0_DAT6	AD2	EMMC
MMC0_DAT7	AC2	EMMC
OSPI0_CSn3	E24	VSEL_SD

4.2 Carrier board connectors X1

4.6 Power Supply

- > The byteENGINE can be powered with 3.3V to 5.5V.
- > The recommended power supply is 5V.

4.7 Boot Modes byteENGINE AM62xx

- > Bootmode Pins are GPMC0_AD[0..15]

2. 2x2BOOTMODE Pin Mapping															
15	14	13	12	11	10	9	8	7	6	5	4	3	2	1	0
Reserved		Backup Boot Mode Config	Backup Boot Mode			Primary Boot Mode Config			Primary Boot Mode			PLL Config			

See chapter 5.3.1 of the Technical Reference Manual for more Details:

[Technical Reference Manual](#)

5. Ordering Info

The **Order Code** allows customers to easily recognize the detailed specification of the ordered SOM. Please refer to chapter [„3.4 Additional information“ on page 8](#) for further information concerning the CPU.

[SOM]-byteENGINE-AM62[TYPE]-[SPEED]-[RAM]-[FLASH]-[temp range]-[revision]

[SOM]:	SOM type	bE: byteENGINE
AM62xx[TYPE]	CPU type	AM6231, AM6232, AM6234, AM6251, AM6252, AM6254
[SPEED MHz]:	Clock speed	1.0, 1.4 GHz
R[xxx MB]:	RAM size	512, 768, 1024, 1536, 2048 MB
[E/GB]:	eMMC flash size	8, 16, 32, 64 GB
[C, I]:	Temperature range	[C] Customer 0° to +95° Celsius, [I] Industrial -40° to +85° Celsius

Example: byteENGINE-AM6254-1400-R512-E8-i
